ENVIRONMENTAL POLICY

The Policy for the environment is expressed through the application of the Environmental Management System (in accordance with EN / ISO 14001: 2015) implemented so that activities, products and services are conducted in compliance with current laws in order to encourage sustainability and to perform the continuous improvement of performances to protect the environment.

Deloro Microfusione is engaged to:

- Promote the principle of environmental sustainability for direct and indirect aspects, also associated with the product and its life cycle.
- Define goals and objectives for improvement and control of significant environmental impacts in order to reduce pollution related to our activities.
- Develop improvement programs by monitoring their application.
- Respect the environmental principles established by the laws and by the various regional regulations.
- Ensure that the of environmental protection principles are considered in the decision-making processes of all company functions and suppliers.
- Empower all staff to practice behaviors consistent with the principles of environmental protection.
- Optimize the consumption of natural resources.
- Monitor and control the reduction, reuse, recycling and disposal of waste.
- Carry out training and information activities for all employees.

The company sensitizes all the managers and workers to the respect of this policy within the scope of their respective duties and competences.

The policy and the evaluation of the significance of environmental aspects are communicated to all the personnel working under the control of the organization, in order to make it aware of the obligations regarding environmental protection, through communications in the departments, company servers and shared with the customers, contractors and suppliers.
